

Countries Supported by SolarEdge Inverters

SolarEdge inverters can be used in many different countries. This document details countries where SolarEdge approves installation of its inverters. Installation should always be done in compliance with local regulations, and in case of a conflict between local regulations and this document, local regulations apply.

Revision history

Version	Date	Description
2.6	July 2025	Addition of new countries, CSS-OD devices Layout changes: • Removed frequency column • Merged comments into existing fields • Added links to European countries
2.5	June 2025	Luxembourg, UK, Italy updates.
2.4	May 2024	TerraMax™ - related updates

Summary

The SolarEdge inverters may be installed in the following countries. Unless stated otherwise, the approval refers to low voltage installations. For medium voltage installations, please contact SolarEdge support. Please refer to the country details below for more information, as in some countries not all grids are supported or not all inverter models are supported.

In supported countries, connection of supported inverters to non-supported grids is permitted through a transformer, if the secondary connection (transformer connection to the inverter) is identical to a supported grid.

NOTE

Transformer procurement, installation, maintenance, and support are the responsibility of the installer. Damage to the inverter due to incorrect transformer installation or use of a transformer that is incompatible with the SolarEdge system will render the SolarEdge warranty invalid.

NOTE

Prior to purchasing a SolarEdge system verify battery compatibility, availability and service in the country.

For installation in countries or with grids not detailed in this document, contact [SolarEdge support](#). Using SolarEdge Inverters with backup requires an External Disconnection Unit (BUI – Backup Interface). For additional information, refer to documentation available in the [knowledge center](#) on our website.

Detailed Information per Country

The tables below provide details for each of the above countries:

- Supported inverters: which SolarEdge inverters may be used in the country
- Inverter country setting: to what country setting the inverter should be configured in order to comply with the local grid requirements including comments if required. Some countries have a submenu that should be used; sub-entries are indicated with the following symbol: ->
