

Quick Installation Guide — Triple Power Lithium-ion Battery

Packing List (T-BAT H 5.8) Note: The quick installation guide describes installation steps briefly. If you have any questions during the installation, please refer to the USER MANUAL which is enclosed to T-BAT H 5.8 for more information. Installation Prerequisites

THE AMBIENCE IS SHADY AND COOL, KEEP AWAY FROM HEAT AND AVOID DIRECT SUNLIGHT.

The ambient temperature is within the range from 0°C to 55°C, and the optimal ambient temperature is between

The Triple Power battery module is rated at IP55 and thus can be installed outdoors as well as indoors. However, if installed outdoors, do not allow the battery pack to be exposed to direct sunlight and moisture.

If the ambient temperature is outside the operating range, the battery pack stops operating to protect itself.

Make sure that the installation location meets the following conditions:

The location is far away from the sea, to avoid salt water and humidity

There is no corrosive gases present, including ammonia and acid vapor.

The building is designed to withstand earthquakes

There are no flammable or explosive materials nearby

The temperature and humidity stays at a constant level.

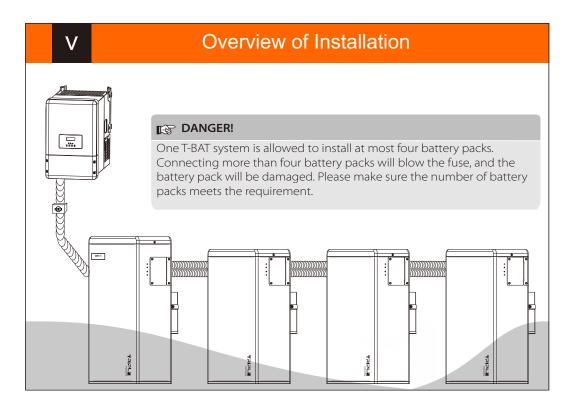

There is minimal dust and dirt in the area.

The floor is flat and level

15℃ and 35℃.

I NOTE!

NOTE!

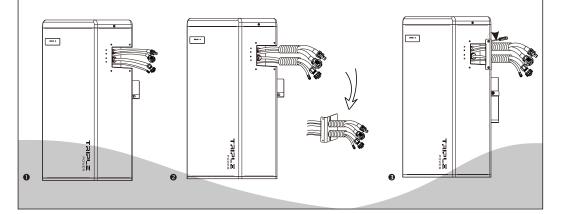

NOTE: 1. The distance between the bottom of battery pack and floor shall not exceed 300mm.

2. It is recommended that the space between battery packs is more than 300mm.

VI

Overall Installation

- 1. Connect the cables.
- 2. Get the cables through the corrugated pipe.
- 3. DO REMEMBER TO INSERT THE SERIES-CONNECTED PLUG AT "-" AND "YPLUG" ON THE RIGHT SIDE OF LAST BATTERY PACK TO MAKE A COMPLETE CIRCUIT.
- 4. Set the cables into the groove of metal plates and screw them back to the battery pack on both sides.

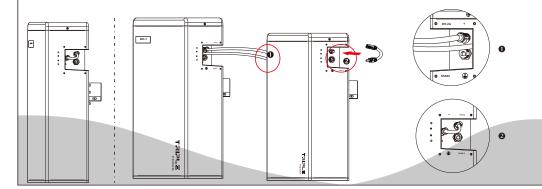

Power Cable Connection

For T-BAT H 5.8:

1. Insert the series-connected plug at "-" and "YPLUG" on the right side of T-BAT H 5.8 to make a complete circuit. For T-BAT H 5.8 + 1~3 battery packs:

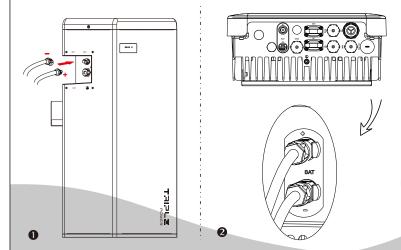

- 1. Connect "-" on the right side of T-BAT H 5.8/HV11550 to "+" on the left side of the next battery pack.
- 2. Connect "YPLUG" on the right side of T-BAT H 5.8/HV11550 to "XPLUG" on the left side of the next battery pack.
- 3. The rest battery packs are connected in the same way.
- 4. Insert the series-connected plug at "-" and "YPLUG" on the right side of last battery pack to make a complete circuit.

VIII

Power Line Connectioin

- 1. Connect the the positive cable (+) and negative cable (-) to the corresponding port as shown in the
- 2. Keep the Inverter off. Connect the other end of charging cables (+,-) to the correct port on the Inverter.

NOTE

Each power line has one terminal block when leaving the factory, and customers need to connect the other end of terminal block by themselves.

Please refer to 4.5.2 Cable Connection Steps of User Manual on page 20 to get detailed connection steps for power line.

IX

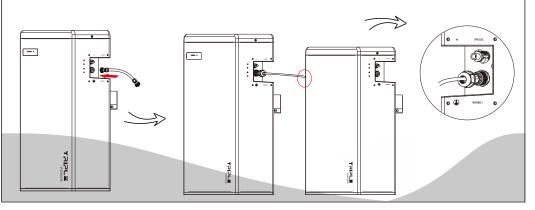

Communication Cable Connection

For T-BAT H 5.8:

- 1. Insert one end of the CAN communication cable which has no cable nut directly to the BMS port of the Inverter.
- 2. Insert the other end of the CAN communication cable to the CAN connector. Assemble the cable gland and screw the cable nut.

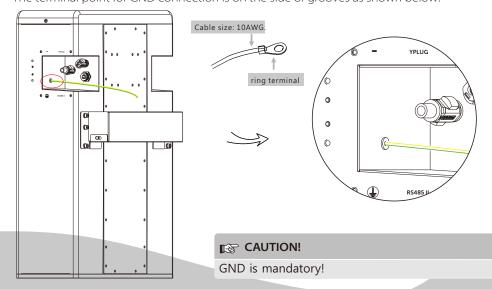

For T-BAT H 5.8 + 1~3 battery packs:

1. Connect RS485 II of upper battery on the right side to RS485 I of the follow-up battery pack which is on the left. Assemble the cable gland and screw the cable nut.

Ground Connection

The terminal point for GND connection is on the side of grooves as shown below:

XI

Commissioning

If all the battery packs are installed, follow these steps to put it in

- 1. Remove the upper cover board of T-BAT H 5.8;
- 2. Remove the small cover plate;
- 3. Rotate the DIP to corresponding number with small tool accroding to the number of battery pack(s) that has(have) been installed(please see the configuration on the right);
- 4. Move the circuit breaker to the ON position;
- 5. Press the POWER button to turn on the T-BAT system; 6. Put the small cover plate back;
- 7. Reinstall the upper cover board to T-BAT H 5.8;
- 8. Power on the Inverter.

0

DIP Configuration:

- Matching T-BAT H 5.8 (default)
- Matching T-BAT H 5.8 + 1*HV11550
- Matching T-BAT H 5.8 + 2*HV11550
- Matching T-BAT H 5.8 + 3*HV11550
